Adhesives & Polymers

Adhesives & Polymers

Welcome to the part of the Sasol Wax website devoted to supporting our customers in the manufacture of Hot Melt Adhesives, PVC processing and polyolefin conversion. Sasol Wax manufacture and supply unique products, such as Fischer-Tropsch waxes as well as paraffin and microcrystalline waxes.

Fischer-Tropsch synthetic waxes are highly crystalline, linear, non-toxic, saturated hydrocarbons. Their low viscosity, hardness and high temperature resistance ensure ideal performance properties in HMA#s, making these products the wax of choice in the industry.

Fischer-Tropsch waxes are excellent external lubricants for PVC, whilst as internal processing aids they provide exciting benefits in the conversion of polyolefins.

Sasol Wax#s range of paraffin and microcrystalline waxes are particularly effective in HMA#s and PVC systems, providing a combination of unique benefits.
