Sasol Wax

Polishes

Polishes

Polishes are used to produce or restore shine on a variety of surfaces such as floors, furniture, shoe/leather and automobiles. They also clean these surfaces and provide protection against abrasion, mar-ring and spills and improve its weather resistance.

Normally a blend of several waxes is required to fulfill these functions, in conjunction with components such as solvents, emulsifiers, abrasives and colourants.

Our waxes find application in a range of polishes, from emulsion and solvent paste types to liquid emul-sions. We also offer intermediate wax blends in emulsion form as well as a number of end products.
