## Sasolwax Link TX

### Sasolwax<sup>®</sup> Link TX

**Sasolwax<sup>®</sup> Link TX** is a novel cross- linking agent concept that enables larger Customers to maintain control over their own Polymer supplies and in- house systems but still have access to the benefits of cross- linking.

New developments now make it possible for customers to now co- extrude **Sasolwax<sup>®</sup> Link TX** plus polymers (e.g. SBS, SBR, SB, Crumb Rubber, PVC, Elvaloy or any polymer used in asphalt modification into an easily usable form. The new technology renders polymers "self- cross linking" thereby easing production of PMA. An extruded version of **Sasolwax<sup>®</sup> Link TX** is also available in addition to a flow able liquid version.
