

Sasolwax 6304

hard wick wax

The special properties of **Sasolwax 6304**:

- *Sasolwax 6304* is designed to be significantly harder than our other wick waxes.
- This increased hardness ensures improved mechanical stability (steadfastness) of the wick, even at high temperatures.
- The waxed wick threads are very smooth and can be bent without breaking.
- The steadfast properties of wicks treated with *Sasolwax 6304* make it ideally suited for use with candle machines which are running fast.
