

VaraPlus 77

Additive for the Manufacture of Candles

VaraPlus 77 is an individual product specifically designed to be used in the manufacture of moulded and extruded candles. The recommended dosage is from 1% to maximum 5%.

The Special Properties of *VaraPlus 77*:

- *VaraPlus 77* reduces, or eliminated, bubbles of air appearing on the candle surface of moulded candles.
- Eases release of candles from the moulds.
- The extrusion properties of many paraffin waxes is markedly improved by the addition of *VaraPlus 77*.
- The surface quality of the candle is upgraded.
- As the melting point is higher when *VaraPlus 77* is added the thermal and mechanical stability of the candle is thus enhanced.
- *VaraPlus 77* improves the fragrance retention of the candle.
