

# Sasolwax 6223

## Container Filling Wax

### Specific properties of Sasolwax 6223:

- Sasolwax 6223 ensures good adhesion to the walls of glass or containers of other material and forms a fine, smooth surface.
- The structure of this product remains completely opaque, creating an intensive display of colour.
- The low melting point guarantees that, even in larger containers, the contents are burnt down completely.
- Its congealing properties ensure quick and cost-saving production.
- High-quality, natural triglycerides of plant origin are a component of this product.
- With Sasolwax 6223, high fragrance intensity can be achieved. The composition of the product grants the candles intense fragrance both on shop shelves and while burning at home.
- Sasolwax 6223 can be delivered only in liquid form.
