

Pharmaceutical Petroleum Jellies

MERKUR[®] and VARA[®] Pharmaceutical Petroleum Jellies

We supply both, white and yellow pharmaceutical petroleum jellies for use in personal care, cosmetic or pharmaceutical products.

Pharmaceutical petroleum jellies are subject to the highest quality requirements, compliance with which is strictly controlled by Sasol Wax.

White and yellow pharmaceutical petroleum jellies

The products consist of highly refined mixtures of hydrocarbons. All products possess good resistance to heat and light. Thanks to very closely defined physical properties such as congealing point and viscosity we can guarantee consistent quality in their end products.

Pharmaceutical petroleum jellies are regarded as generally safe. The products are not known to have any allergenic, comedogenic, skin irritation or toxic effects. The products conform to all requirements of international pharmacopeia and cosmetics regulations.

INCI: Petrolatum
