

EnHance

EnHance®

EnHance® is a straight chain, pure, Fischer- Tropsch (FT) hydrocarbon. Its unique chemical structure imparts to it an attribute that has been found to be extremely beneficial to the processing of Polyolefins. This attribute of low viscosity in the molten state has been through numerous plant/ production scale trials globally, proven as a beneficial processing aid in improving the productivity and efficiency of the following PO conversion processes:

injection moulding

extrusion

compounding

extrusion blow moulding

There are two grades on offer:

EnHance®

EnHance FG® (Food Grade)
